

CARDIFF UNIVERSITY
PRIFYSGOL CAERDYDD

During my time as a Tutor within the Dental Postgraduate Department, Cardiff University, I have greatly valued Mark's input to my study day programmes for both Dental Foundation Training (year 1) and also for The Introduction to Practice scheme for Dental Therapists.

Mark has delivered his lecture on Tooth Surface Loss several times. Feedback is always excellent and he manages the group interactions in an assured and easygoing way.

He has also assisted in hands on sessions on the use of Loupes and treatment planning for extra coronal restorations.

He is part of my regular planning for study day delivery and his participation is very much valued and appreciated.
