

CARDIFF UNIVERSITY
PRIFYSGOL CAERDYDD

'Mark Hill has been involved in the Cardiff Dental foundation year 2 training for the last 2 years. Mark has been a pleasure to work with, he is enthusiastic and reliable.

Mark has recently taken study days titled 'diagnosis of tooth surface loss' and 'advanced restorative techniques' which have had very favourable responses from the DF2s attending.

Mark's down to earth manner in conjunction with his credentials as a local General Dental Practitioner running a busy high street Dental Practice definitely resonate with the recent graduates undertaking DF2 training.'
